[a] The Return from the Carlow Union Workhouse does not specify the cause of death in 1,440 instances, 775 males and 665 females, and the Master states "that the cause of death was marked on the Return wherever it appeared on the Workhouse record, but for those cases not marked no accurate registry was or is attainable."

[b] The Return from the Kilkenny Union Workhouse does not specify the cause of death in 2,738 instances, 1,476 males and 1,262 females, and the Police state, that owing to the imperfect state of the records, no further information can be procured. Through the exertions of Doctor R. Cane, the documents were procured from which the cause of death was extracted in the 1,485 instances above stated—(4,223—2,738)=1,485.

[c] The Return from the Callan Union Workhouse does not specify the cause of death except in a very few instances; and the Police report that the "Master of the Workhouse states he could not give the information."

[a] The Return from the Scarriff Union Workhouse does not give any account of the deaths therein previous to the autumn of 1847, nor the age, sex, causes of death, or season previou to the spring of 1850.

[b] The Return from the Kilrush Union Workhouse states that the Medical Officer has kept no registry from which the cause of death could be ascertained.

[c] The Return from the Middleton Union Workhouse states that "no registry of cause of death was kept." In 1,018 instances, 556 males and 462 females, the cause of death wa supplied through the kindness of Dr. Barry, the Medical Attendant, from his "case book."

[d] The Deaths in the Kinsale Union Workhouse between December, 1841, when the house was opened, and the 25th March, 1850, are stated to amount to 4,838; and the Police repo that "owing to the dismissal of the Master and Clerk, originally appointed, for irregularities, no further information can be supplied."

ne Number, Amount, and Causes of Death, from the 6th of June, 1841, to the 30th of March, 1851, so far Workhouses and the Medical Attendants—*continued.*

The Return from the Kanturk Union Workhouse sets forth the deaths from July, 1844, the date of the opening of the establishment, to March, 1849, by half-yearly totals, without stating the sexes, ages, causes of death, &c., and states that the records of names, &c., were destroyed in August, 1850, by the burning of the Workhouse.

The Clonakilty Union Workhouse had not been opened at the date of the present Census.

The Return from the Listowel Union Workhouse gives the number of deaths from February, 1845 to December, 1846, in monthly totals, without specifying sexes, &c., and does give the cause of death until the Summer of 1848, the Master stating that "he has no way of ascertaining the cause of death prior to that date."

[a] The Return from the Kilmallock Union Workhouse states that "the Medical Books containing the cause of death between the Autumn of 1842 and the Summer of 1844, a from the Autumn of 1847 to the Summer of 1848, cannot be found."

[b] The Return from the Rathkeale Union Workhouse states that the records do not specify the cause of death previous to the Winter of 1848.

[c] The Return from the Cashel Union Workhouse does not specify the cause of death unless in those cases which occurred in the Spring and Summer of 1850, and states that " death books record no statement of disease," and that "the causes of death supplied are taken from a Return prepared by the Clerk of the Union."

[d] The Return from the Waterford Union Workhouse states that "the causes of death have not been supplied, because the documents from which the desired information might h great measure be obtained, have been lost."

[e] The Return from the Dungarvan Union Workhouse does not specify the cause of death, and the Master states that "the records are so imperfect and mutilated that it was qu impossible to glean from them the required information."

[f] The Workhouse of Kilmacthomas Union had not been opened at the date of the present Census.

[a] The Return from the Lisburn Union Workhouse does not specify the cause of death in 713 cases (356 males and 357 females), and states that such had not been recorded.

[b] The Return from the Ballymena Union Workhouse does not specify the cause of death prior to the end of the Summer of 1848; and the present Medical Officer states that "I could not find any record of such prior to his appointment."

[c] The Return from the Newry Union Workhouse is deficient as to the cause of death from 15th March to 2nd May, 1847, "the Medical Officer of the Union having been during the period indisposed with fever."

[d] The Return from the Armagh Union Workhouse does not give the cause of death during March and April, 1847, "no records having been kept; consequent on the death of the then Medical Attendant, and the illness of his temporarily appointed successors."

Number, Amount, and Causes of Death, from the 6th of June, 1841, to the 30th of March, 1851, so far orkhouses and the Medical Attendants—*continued.*

[a] The Return from the Cavan Union Workhouse is deficient as to the cause of death in 2,107 instances (1,042 males and 1,065 females); and the Master states, that "in those cases diseases are not recorded in the doctor's books."

[f] The Union Workhouse of Bawnboy had not been opened at the date of the present Census.

[g] The Return from the Glenties Union Workhouse does not specify the cause of death in 253 cases (119 males and 134 females); and the Master states that "those persons did not to the Hospital, but in the Workhouse at large, as their deaths appear only in the Master's records of deaths and not in the doctor's books."

a The Return from the Loughrea Union Workhouse does not specify the cause of death in 1,008 instances, 555 males and 453 females; and the Master states that "owing to the c of the books no farther information can be given." These deaths occurred previous to the autumn of 1848, the date of the appointment of Dr. Lynch, the present Medical Attend

b The Union Workhouses of Glennamaddy, Mountbellew, Tobercurry, and Dromore West, had not been opened at the date of the present Census.

c The Return from the Mohill Union Workhouse does not specify the cause of death in a single instance, and the Clerk of the Union states that "no farther information can be supplied, as in certain years between 1841 and 1851 it became impossible to keep a regular record of the number of deaths and causes."

d The Return from the Boyle Union Workhouse states that "in consequence of the extraordinary pressure on the time of the Medical Officers of that house no record of the ca

The Return from the County Cork Gaol does not specify the cause of death except in a few cases, and the Medical Attendant states that it is "impossible to give any urate information as to the cause of death in each individual case."

The Return from the County Tyrone Gaol at Omagh is deficient as to the cause of death up to the spring of 1846.

In the Census of 1841, the Civic District of the Province of Ulster embraced the undernamed Towns, which had then each a population of 2,000 and upwards; but as, in 1851, their respective populations had fallen below that number, their inhabitants are, in the present Census, included with the Rural District, viz.:—Letterkenny, in the County of Donegal, and Dromore, in the County of Down. The Town of Gilford, in the County of Down, which, in the Census of 1841, was included in the Rural District, is, in the present Census, included in the Civic District; its population having increased from 643, in 1841, to 2,814, in 1851.
